Ex. 5 Deliberative Process (DP)

- We do not have an interactive map, so for now I took a screen capture of the sample locations map and placed it in the page. The caption refers people to the PDF of all the investigation maps.
 - It would be better to have a different map, perhaps a simple one showing the location of this sample area in the state of Wisconsin.
- I think the language on the page will be unintuitive to people unfamiliar with water sampling. "Temporary" seems like it's being used in a specialized way (to mean "point in time"?).
- Does this page need to explain the significance of any findings, or just report the findings for now?
- The page will probably need some contact information, links to any relevant resources, and any information about what will happen next.
- I combined the five maps into a single PDF. If that is a problem for any reason, let me know and I will post five separate PDFs.

Thank you,
Karen

Subject: RE: Juneau County Groundwater Investigation Website

Thanks. We met this a.m. and discussed the results of recent data sampling by the counties and EPA.

It makes sense to me to work with WDNR on next steps, particularly in light of the recent data results, including giving WDNR a chance to review the region's draft website, ensuring outreach to households that have or could have nitrate levels about the standard, discussing potential regulatory and enforcement steps by WDNR/EPA, and discussing joint WDNR/EPA participation at the counties' July 17 public meeting. Including Anne for review of the draft website and help in discussing July 17 public meeting.

Let's touch base this Monday, in advance of Tues 8:30am touch base call with Pat S.

Dean would be good to consult with...Pat, do you know if Dean is in tomorrow?

Thanks. For Central Sands, could we do a short consult on what data is showing and next steps? I know you're out tomorrow – let me know if I could confer with someone else?

Hi, Jim. Please see the message below regarding release of the groundwater data to DNR and the public. Are you ok with this approach and do you want to review the website that Jennifer Ostermeier is working on with Dean Maraldo?

Linda

Linda – It looks like we will be ready to share the full groundwater data (41 borings on public right-of-way) with the public soon. To do so, we are creating a website. As discussed earlier, WDNR wanted the data prior to release. To do that, we could give Wisconsin access to the website a week before it goes live. **Does that sound ok?** It looks like we will be ready to share it next week sometime.

We will not include the private well data on the website. Those people have been notified directly.
